INTERIOR DESIGN CONSULTING

Our Interior designer stay abreast of the latest industry trends through continuous product training. They can provide technical support and expertise for any design solution, presenting the best interior design proposals to enhance the architect's project and satisfy the client.

QUOTATION SERVICE

Given the current pace of the market, receiving an **immediate and accurate** response is crucial. Our staff is organized to provide detailed and precise quotations to both the professional and their clients.

CORPORATE SHOWROOM VISITS

We offer architects, along with their clients, the opportunity to experience a **unique customer journey** by guiding them on visits to corporate showrooms once the inspirational brand is identified. **An immersive experience.**

PRIORITY PROGRAM

Binacci reserves special conditions for professional designers:

.01

Facilitated and guaranteed **delivery times** through agreed planning.

.02

Premium support services in all project phases, even after its completion.

.03

Exclusive previews of new products, access to offers, and promotional sales.

For Individuals

DESIGN

Binacci Experience

In addition to offering **the finest Italian brands** that set the trends in international design, Binacci is structured to meet requests in customized design. A team of professionals, including architects and interior designers, is available to accommodate requests as the project takes shape. The client will receive detailed project drawings with precise furniture placement and corresponding technical drawings.

With over **75 years of field experience**, our professionals have developed a thorough understanding of the various brands offered and possess profound knowledge in interior design, delivering high-level achievements in every aspect.

For Individuals

MEASUREMENTS AND ASSESSMENTS

Experience Binacci

Attention to detail is our passion. That's why our architects work down to the **millimeter**. Precision is crucial to ensure a smooth assembly phase. This is why our professionals are always available to conduct on-site surveys and measurements at the project site, whether it's a construction site or an existing building. They use highly precise instruments and, most importantly, draw on extensive field experience.
